This valuable **guide** – compiled by Dr Christian Thuile and Prof. Dr. med. Johanna Hübscher – guides you through the wide range of **possible applications for the MRT probe (rod) applicator.** The recommended applications serve as a ‘guiding principle’ for various indications. Please feel free to consult your trusted doctor at any time, provided they are familiar with

Produktinformation

Magnetic resonance applicator

The **probe (rod) applicator** is used by therapists and medical professionals specifically in **dentistry** – but also on **acupuncture** and **trigger points**, as well as on joints (fingers, toes, wrists and knees, etc.).

If you are looking for **localised application of magnetic resonance**, the **MRT probe (rod) applicator** is ideally suited for this purpose.

You can find a brief **insight into the book** via the **images** in the appendix.
